Qcom strengthens Avery Dennison links

Auto ID maintenance specialist Qcom has been building on its recent appointment as an approved maintenance and technical services supplier for Avery Dennison equipment.

Avery Dennison is a world leader in labelling solutions for product identification and data management, with a wide range of products including fast, versatile printers for all types of retail and industrial labels and tickets.

Qcom provides a range of maintenance and technical services for these products, and Channel Account Manager Phil Meadows has been touring the UK's Avery Dennison approved resellers to demonstrate how Qcom can complement their existing in-house provision of these important after-sales services.

“Avery Dennison produces a first-class range of label printers, applicators and print apply systems, ticket and tag printers and RFID label encoders. After-sales support is a vital part of any labeling and data capture package, and as an approved supplier for Avery Dennison, Qcom is perfectly placed to help resellers build this part of their business.

“Whether it is increasing capacity or helping deal with peaks and troughs in demand, Qcom technical support is the perfect complement to any in-house service operation.”
